

## A GREAT DANGER

## A GREAT DANGER CONFRONTS OUR ARMY

## CONFRONTS OUR ARMY:

They Must Occupy Cuba, Porto Rico, Manila and  
Perhaps Spain.

Thousands of Natives Themselves Die of Yellow, Typhoid  
and Malarial Fevers Annually.

**EVERY PRECAUTION MUST BE TAKEN.**

During the late civil war statistics show that more men died from exposure than were killed in battle, and this, in our own country, where such fatal scourges are unknown. What then was the result when thousands of our soldiers are sent to these pest holes? Since the Cuban insurrection began, some two short years ago, Spain has sent to the island more than two hundred thousand men, of which less than two thousand have been killed in battle. Yet, there are but a few more than eighty thousand left to-day, the rest having died or are now in hospitals, stricken with disease. Every precaution, then, should be taken to protect our men. STOMACH MEDICINES ARE OF NO USE, as the germs of these diseases are inhaled and must be destroyed before being absorbed into the system. Two years ago this would have been impossible, as up to that time no germicide had ever been found which could be taken to all parts of the head, throat and lungs by the air we breathe, and yet be powerful enough to kill disease germs. Since the discovery of "Hyomel," Catarrh, Bronchitis and Consumption have been removed from the list of dangerous diseases; moreover, the medical profession

now claim that all germ diseases, such as typhoid, are spread by insects. In fact, the English Government have been so thoroughly convinced of this that at their own expense they are having transplanted all fever-infected districts in India trees from which the principal ingredient of Hyomel is obtained, the presence of these trees alone freeing the surrounding territory from these diseases. Not only will Hyomel destroy all forms of germ, but causes colds and catarrhs can exist where it is used. You will readily see, then, how invaluable this new germicide will be to our army in any part of the world. In truth, it is the only protection we can give to troops, and it is the duty of every father, mother, sister, brother and wife, to see that their loved ones are supplied with Booth's Inhaler, which (with sufficient Hyomel) will protect them from all diseases. It is well known that Hyomel will destroy disease germs in the air we breathe, and which nature permits to enter the air passages in the head, throat and lungs.

## IMPORTANT NOTICE.

The Government of Hyomel has made arrangements by which all their Outlets

Extra Bottles will be forwarded to our soldiers in all parts of the world free of them.

Hyomel Outfit Complete (Including Inhaler and Extra Bottle).....	\$10.
Extra Bottles .....	5.
Hyomel Balm (wonderful healer).....	5.

**IMPORTANT ANNOUNCEMENT.**

Beginning Monday, May 23d., and continuing for one week, free treatment with Hyomel free samples of the same will be given at the following drug stores: F. W. Kinsman, Jr., 125th St. and 8th Ave. 343 Fourth Ave.

**MANUFACTURED ONLY BY THE R. T. BOOTH CO.,**

ASTOR COURT BUILDING, WEST 33d ST., Next Waldorf Astoria Hotel, NEW YORK

Sold by all Druggists or Sent by Mail on Receipt of Price.

# SHOW.

**Admission  
Free to  
Children.**

Of the people who have come to the Electrical Show more than a hundred thousand have passed through Moore's Daylighted Chamber. *These hundred thousand will tell a million.*

If the show could be kept open two or three months it would do more advertising other than the good words that are passed from one to another.

But—here's the warning—you have **only eight days more.**

Electricity is working a revolution in peace as well as in war. Most of you know that. This Electrical Show is the epoch making demonstration. The demonstrations are complete, practical—a perfect revelation of the new revolution.

Moore's Chapel—Assembly Rooms.  
United States Mine Engines—Basement.  
Edison's new Separation—Main Floor.  
Wireless Telegraphy—First Balcony.  
Disappearing Gun—First Balcony.  
Electricity in Wax—Concert Hall.

Electrical Forge—Main Floor.  
Water Freezing—Main Floor.  
Theatrophone—First Balcony.  
Electrical Cradle—Main Floor.  
Galvanosthetic Work—Assembly Rooms.

Dynamite Gun—First Balcony.  
 Marine Torpedo—Tank, Main Floor.  
 Electrical Cascade—Fourth Avenue End.  
 Underground Trolley—Main Floor.  
 Third Rail System—Assembly Rooms.

War Bulletins—Concert Hall.  
 Diamond Making—Assembly Rooms.  
 Electrical Cooking—Main Floor.  
 X-Rays—One Flight Up.  
 Electrical Flat Irons—Main Floor.

All easily understandable. War things you've been reading o  
 weeks and failed to comprehend—grasped at a glance. Man or wo  
 boy or girl, will learn more here in an hour than otherwise in a  
 time—with almost no effort and a great deal of pleasure.

50 cents admits you to everything—Children Half Price.

SPECIAL MONDAY NIGHT—Grand Opera in the Milwaukee Opera House will be heard at the El  
 Show—over the long-distance telephone and through the telephones.

YALE'S ROUSING DEMONSTRATION.

Auction Sales.

A STIRRING MASS-MEETING-THE CRUISER FUND COMMITTEE HAS A SURPLUS OF \$2,000.

New-Haven, May 21 (Special).—In spite of the positively discouraging work of collection the Yale Cruiser Fund Committee finds itself, at the latter writing, with a surplus of \$2,000. This is after paying for two Vickers-Maxim semi-automatic 3-pounder rapid-fire guns, costing \$3,200, and a stand of fifty-one coils, costing nearly \$500, and all expenses of collection, and of the mass-meeting.

Without serious effort enough money for the entire battery for an auxiliary cruiser could easily have been secured. The committee says the fault of a surplus is with the Yale men, who insisted on doing more than they were asked to do. One example is New-York City's contribution. The Yale colony there was asked for \$1,500; they have made it, \$1,900, to date. This was in subscriptions of

**Floral and Arboreal Plants**

Yale men. No formal action has been taken as to the disposition of the surplus, but it is the present mind of the committee to hold it for a while, until it is seen what the needs of the war may be.

This generation has not seen such a meeting at New-Haven as Yale held last night, at College Street Hall. The big church, gallery, floor and aisle, was crowded to the vestibule. The men hung everywhere from the rails of this University hall. President Dwight was in the chair, and the leading members of the faculty were on the platform. Dean Wright, of the Academic; Dean Phillips, of the Graduate School; Professor Weir, of the School of Fine Arts; Professor Porter, of the Divinity School; Professor Richards, of the Scientific School, and many others were seen at this demonstration of Yale loyalty. The spirit of the meeting was shown not only in the rousing cheers with which the Yale student officers of the last year, the Connecticut Light Artillery were greeted as they took their seats on the platform, nor yet alone in the spirit with which the great crowd, under the leadership of the Glee Club and the 2d Regiment Band, sang the National anthem, but in the deathly earnest attention with which the great audience followed the words of the speaker. When President Dwight repeated the eloquent opening speech, he repeated the historic loyalty of Yale, and wound up by repeating the final line of Yale's favorite College song, "For God, for Country and for Yale." The old church trembled and rocked with the applause. And when the speaker, in the name of its prosecution of the war, and formally tendering, as he presented the surplus, the campus and some of the regiments singing there ended one of the

imported by Messrs. Kushibiki & Arai, of Japanese Landscape Gardeners of Tokyo, proprietors of the Japanese Tea Garden, at City, N. J., and afford a pleasing and instructive object lesson to the admirers of the beautiful curious in nature.

The specimens are all planted in hand Japanese porcelain Jardinieres.

to close up because their students were rushing to the defence of the Government. He also in without reserve the cause of the war, and the name of the Government, and was cheered and applauded.

The thought was several times brought to the speakers that they recalled the report of the result of the war—that North and South a sections of the country were at one.

The march of the thousand graduates and the present of the campus and some of the regiments singing there ended one of the

to the cruiser Yale, the same earnest enthusiasm came out in the applauding throng. Dr. C. C. Fessenden, the rector of St. Paul's Church, and a graduate of nearly thirty years' standing, in speaking of the resolutions dwelt eloquently on the credence of the cause on which the United States had launched.

Professor Bernadotte Ferris, of the Greek department, was particularly effective addresser. He spoke of the regret with which the University had parted at this time, with which the University followed them. He said that so long as the emergency was no greater than required to restrain the enthusiasm for further enlistment, but that he, for one, opposed any restraint which was not warranted by the facts. He commented on the fact that while in some Continental countries, the government was guarding against the possibility of attack by the United States, the Universities were wondering whether they would have

THE ONEIDA SAILS FOR KEY WEST

Boston, May 21.—The dispatch-boat Oneida, Lieutenant Miller, U. S. N., commanding, sailed for the Navy Yard to-day, under orders to proceed to Key West. The Oneida was formerly yacht Illawara. There are only two officers on the Oneida. Lieutenant Miller, commanding, and Ensign Estlin Davidson. There are two men, two men, for armament carries four 1-rapid-fire guns.

The revenue cutter Calumet, from Chicago, has been in port on the Great Lakes, arriving at the Navy Yard yesterday. She is commanded by Lieutenant-Commander W. U. Cushing. The cutter is expected to be transferred to the Wabash, and will be transferred the repair-ship in a day or two.
